

# Online membership form

## Integrated with your Data Support Service

Sign up members online quickly and easily with no need for data entry. Membership Engagement Services (MES) can provide you with a secure online membership form which inputs the membership data directly into your MES membership database.

### Seamless integration with your database

Take full advantage of the seamless integration between an online form and database by combining this service with the MES Data Support Service.

Using the new 'Quarantine' area on the database, membership managers can review all online applications before deciding whether to accept or discard them. Once accepted the application form is subject to all the usual rigorous checks that MES' system provides (including duplicate checking and address validation), to ensure your membership data is always clean and 'election-ready'.

What's more, if you want to change your membership form, all you need do is make the relevant change in the 'Administration' section of your database as you normally would, and the online form will change to match it straight away.

Even Trusts that choose not to use MES' database can still reap the benefits - applications will be provided in an excel file having been cleaned using all the checks available. This can be done daily, weekly or fortnightly - it's up to you!

## In keeping with your Trust's branding

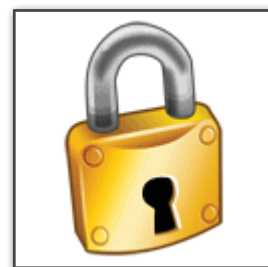

We design our forms to match your Trust's own branding and can include your logos. We know how important it is to preserve your identity, whilst keeping the form simple and easy to use.

The image shows two examples of NHS registration forms. The top form is for Central Manchester University Hospitals NHS Foundation Trust, featuring a blue header and a registration form with fields for name, date of birth, and gender. The bottom form is for South Essex Partnership University NHS Foundation Trust, featuring a purple header and a registration form with fields for name, date of birth, gender, and address.

## Hosted securely

Security is paramount to us at MES, and we use the same high-secure, internet-banking standard of security that is employed for our database.

Hosted securely on our servers, your membership details are never at risk. Using our online membership form and database means membership details never need to be emailed before entry onto your database.

## Value for money

Our new online membership form is available for a one-off fee, with no ongoing costs. Not only are data entry costs eliminated (as it does all the entry automatically), but the advanced integration with your MES database means you don't need to pay web-designers to change your online form when you change your hard copy - it's all done automatically!
